AUDIO VISUAL CONTROL SYSTEMS: STANDARD OPERATING PROCEDURE

Audio Control is by far the most important part of a presentation.

IMPORTANT, mute everything except the device you are going to use. For example if you are using the CD, mute the blu-ray and FOH microphones, unless you use wish to them. Start with a low volume and gradually raise it to the desired level. Remember if you are using Bluetooth as a source, the audio control on your device can also increase or decrease the source level.

The Control Room audio allows you to listen the source in the control room.

Remember to select "OTHER AREAS" to control the audio in these locations.
