# Crestron AirMedia (Android)

2.0.0.3

## Product or Content Description

---

Applies to the following Android apps:

- Crestron AirMedia 2.0.0.3

## Notes and Recommendations

---

- This version of the Crestron AirMedia app is compatible with the following Crestron Airmedia Presentation Gateway models:
  - AM-101
  - DMPS3-4K-250-C with the SW-DMPS3-AIRMEDIA upgrade installed
  - DMPS3-4K-250-C-AIRMEDIA
  - DMPS3-4K-350-C with the SW-DMPS3-AIRMEDIA upgrade installed
  - DMPS3-4K-350-C-AIRMEDIA
  - Crestron Mercury with firmware 1.3557.00038.001 or later
- This version of the app is not compatible with the AM-100 AirMedia Presentation Gateway. AM-100 Android users will be directed to the AirMedia for AM-100 Android app upon first attempt to connect to an AM-100.

## System Requirements and Dependencies

---

Android 5.0 or greater is required.

## Operational Installation/Upgrade Instructions

---

Existing users of the previously-released version of the app will obtain an update the app from the Google Play store. Users of the AM-100 will need to upgrade to the separate AirMedia for AM-100 app.

## Version History

---

Version	Date
2.0.0.3	2018-01-19

### Changes since Last Version

#### New Features

- Improved user interface
- Full-screen mirroring  
(Note: Document rendering, Browser and Shot&Show features have been removed)
- Ability to connect to AirMedia Presentation Gateways when mDNS/Bonjour ports have been blocked
- Ability to detect and connect to AirMedia Presentation Gateways linked to PP-100 PinPoint Proximity Detection beacons when properly provisioned through Crestron Fusion enabled with Crestron PinPoint
- Ability to provide calendar and meeting information via Exchange login

#### Bug fixes

- Stability and performance fixes
- All performance and bug issues related to Document rendering, Shot&Show and Browser functions resolved due to full-screen mirroring capability

#### Known Issues

- Quad view, moderator mode and remote view are unavailable from this app. For the AM-100 and AM-101 Presentation Gateways only, the AirMedia for AM-100 Android app is required in order to retain such functionality.
- Audio sending capability is unavailable from this app.

Version	Date
1.0.2.3	2017-02-21

### Changes since Last Version

#### Bug Fixes

- Corrected an issue where zooming in on a pdf and navigating caused a crash
- Corrected an issue where certain Android devices will lose connection to the AM-101
