# Crestron AirMedia (iOS)

2.0.10

## Product or Content Description

---

Applies to the following iOS apps:

- Crestron AirMedia 2.0.10

## Notes and Recommendations

---

- This version of the Crestron AirMedia app is compatible with the following Crestron Airmidia Presentation Gateway models:
  - AM-101
  - AM-200
  - AM-300
  - DMPS3-4K-250-C with the SW-DMPS3-AIRMEDIA upgrade installed
  - DMPS3-4K-250-C-AIRMEDIA
  - DMPS3-4K-350-C with the SW-DMPS3-AIRMEDIA upgrade installed
  - DMPS3-4K-350-C-AIRMEDIA
  - Crestron Mercury
- This version of the app is not compatible with the AM-100 AirMedia Presentation Gateway. AM-100 iOS users will be directed to the AirMedia for AM-100 iOS app upon first attempt to connect to an AM-100.

## System Requirements and Dependencies

---

iOS 11.2 or greater is required.

## Operational Installation/Upgrade Instructions

---

Existing users of the previously-released version of the app will obtain an update the app from the Apple app store. Users of the AM-100 will need to upgrade to the separate AirMedia for AM-100 app.

# Version History

---

Version	Date
2.0.10	2019-02-27

## Changes since Last Version

### New Features

- In conjunction with the AM-200/300 new presenting experience, a launch URI scheme is supported. The Airmedia landing page on these devices have been updated to be much simpler. Upon clicking “start presenting” button, the application is automatically launched if it is already installed or the user is redirected to the app store if not installed.

### Bug fixes

- Fixed an issue where the application requests upgrade of the AM-100/101 instead of connecting via the legacy AirMedia for AM-100 application.
- Fixed various language related issues (Hebrew, Japanese, etc.)
- Fixed an issue where connection instructions on iOS 11 are incorrect.
- Fixed an issue where a receiver could not be removed from favorites.
- Fixed an issue where favorites list is empty for a period of time
- Fixed an issue where after selecting a device from the Discovered list and selecting Present, pressing another device fails to highlight that device.
- Fixed an issue on the Apple iPad Pro, when pressing back button from AM for AM-100 returns you to AirMedia app but discovered list is empty
- Fixed an issue with discovered list formatting
- Fixed an issue where a refresh results in incorrect receiver count
- Fixed various scaling issue dependent on device type
- Fixed an issue with properly refreshing the recent list
- Fixed an issue where recent and favorites are not sorted
- Fixed an issue where the discovered list would become unresponsive after an initial connection to device and the airplay prompt appears.
- Fixed an issue where recent list could not be cleared.

### Known Issues

- Video push mode from streaming video apps upon connection through iOS Screen Mirroring is not supported when connected to the AM-101.
- For devices that have manually-entered connection information, the iOS Screen Mirroring function must be activated within one minute of entering the connection information or selecting a receiver to connect to, or the Screen Mirroring device list may not display the desired AirMedia Presentation Gateway to connect to.
- Quad view, moderator mode and remote view are unavailable from this app. For the AM-100 and AM-101 Presentation Gateways only, the AirMedia for AM-100 iOS app is required in order to retain such functionality.

Version	Date
2.0.3	2018-01-25

## Changes since Last Version
